

## Mobilising, Motivating and Developing a Team

**How to create and maintain a high performing team that works capably and harmoniously.**

When a true team spirit exists the results can be truly inspirational.

### **Course Outline**

One of the key tasks for any manager is to encourage their team to work effectively and harmoniously. This is seldom easy because the dynamics can fluctuate in line with changing events and personnel.

This workshop helps managers to gel a range of diverse personalities, mind-sets, skills and knowledge into a winning team that consistently meets its objectives.

By the end of this session delegates will be able to:

- Mobilise a new team in the early stages by fact-finding, building rapport and setting standards of behaviour and conduct
- Contribute to a working environment where the team works cohesively together
- Assign suitable roles and responsibilities that maximise individual skills, knowledge, personal characteristics and experience.
