

# Family Practitioner Network

**The Family Practitioner Network provides professional advice and information for all those working with families in a supportive and advisory capacity.**

*'Our network meetings give me the chance to catch up with colleagues and share information and good practice. The speakers are always relevant and provide a wealth of information and resources for my work with families. The newsletters contain lots of useful information covering a range of topics and help me keep my knowledge relevant and up to date.'* (Feedback from May2017 network meeting)

**The 6 meetings (one per half term) provide the opportunity for practitioners working directly with families to:**

- receive ongoing CPD
- receive relevant and current briefings from statutory bodies, voluntary organisations and support agencies
- facilitate co-operation, mutual support, the sharing of resources and best practice.

They are also members of a virtual discussion forum, receive half termly newsletters and receive email and telephone support from a specialist adviser.

## **Phase**

**Cross phase**  
(Primary, Secondary, Special)
